

# ENTERPRISE SOCIAL

Everything today is social... What does it mean to be Enterprise social!?

# Examples

- ▣ RSS
- ▣ Facebook, Google+, etc.
- ▣ Blogs
- ▣ Some Instant Messaging Clients:
  - BigAnt
  - Bopup
  - Dbabble
- ▣ Yammer (recently acquired by microsoft)

# Usually Includes

- ▣ Ability to log messages
- ▣ Security plugins or encryption
- ▣ Group Chat features
- ▣ Hooks
- ▣ Licensed (internal server bound applications)
- ▣ File transfer ability
- ▣ Terminal server

# Why Use It?

Don't want to get up from your desk!

Sending sensitive material

Asking a simple question may be time consuming.

Keep remote locations tied together

Log he said/she said

# Who's Using It?

- ▣ Everyone almost!
- ▣ 90% of Fortune 500 companies
  - A 70% increase from 2011 according to wired mag
- ▣ Apple
- ▣ Oracle
- ▣ Google
- ▣ Microsoft
- ▣ Nationwide

...and the list goes on...

# Where Is It Going?

- ▣ Automated ads
- ▣ Consulting
- ▣ Virtual Team Rooms, cubicle walls that make the desk look longer... Change channel -> Change teammates!
- ▣ Customer collaboration

# Microsoft Says...

- ▣ 6 stages of collaboration
  - 1. Basic, 2. Standardized, 3. Rationlized, 4. Internal Integration, 5. Holistic Integration, 6. Innovative
  
- ▣ There are obstacles at each stage that must be overcome. In order to hit the Dynamic stages (4-6) you must begin to use enterprise worthy social mediums.

# Someday

Similar to how the all computers ended up using a keyboard and mouse. All social media platforms are going to move toward a uniform social experience. The end goal is to keep enterprise companies open to growth eliminating barriers and getting work done.

# Questions?

- ▣ Questions? <= French...
- ▣ ¿Preguntas?
- ▣ الأسئلة؟
- ▣ Вопросы?
- ▣ Fragen?
- ▣ Ερωτήσεις;
- ▣ Pitanja?
- ▣ 質問？
- ▣ 有問題嗎？
